

Memo

From: John Dickey
To: CALFED Agricultural Water Quality Sub-team
Subject: Your input regarding CALFED actions

As agreed at the August 22, 1996 meeting of the Agricultural Water Quality Sub-team, this memo requests your evaluation of CALFED actions. According to your direction at the last meeting, the list has been reviewed and reorganized to clarify actions and to reduce redundancy. This reorganized list is attached, including actions numbered 1 to 41.

That's right, 41. The requested steps for getting your input without taking up too much of your time is the following:

1. Read the entire list of actions.
2. Review each action, and make notes on the attached sheets in preparation for the meeting on September 18.
3. Bring your notes to the meeting. If you cannot attend, then please prepare them in a legible, comprehensible format (handwritten, typed, diskette, email, dictated), and mail them to me at CH2M HILL, P.O. Box 492478, Redding, CA 96049-2478 by Friday, September 13, or FAX them to me at 916/243-1654 by close of business on Tuesday, September 17.
4. We will compile and review them during a discussion of the actions list at the September 18 meeting.

As always, thank you for your expert input.
